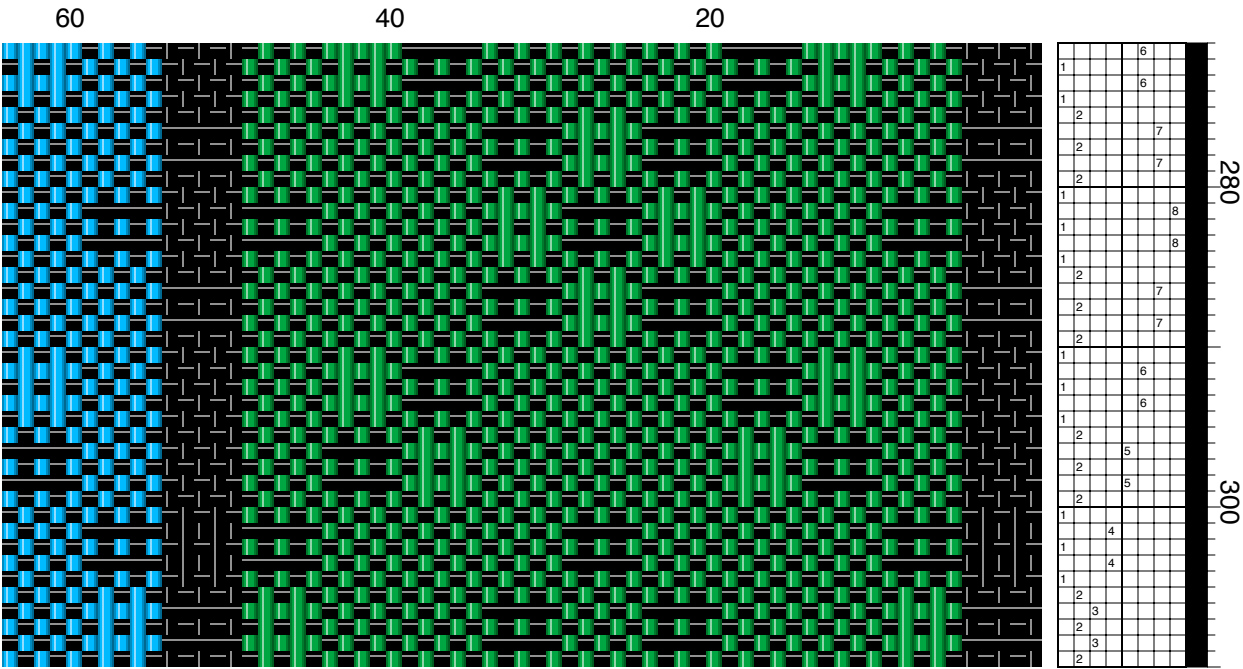

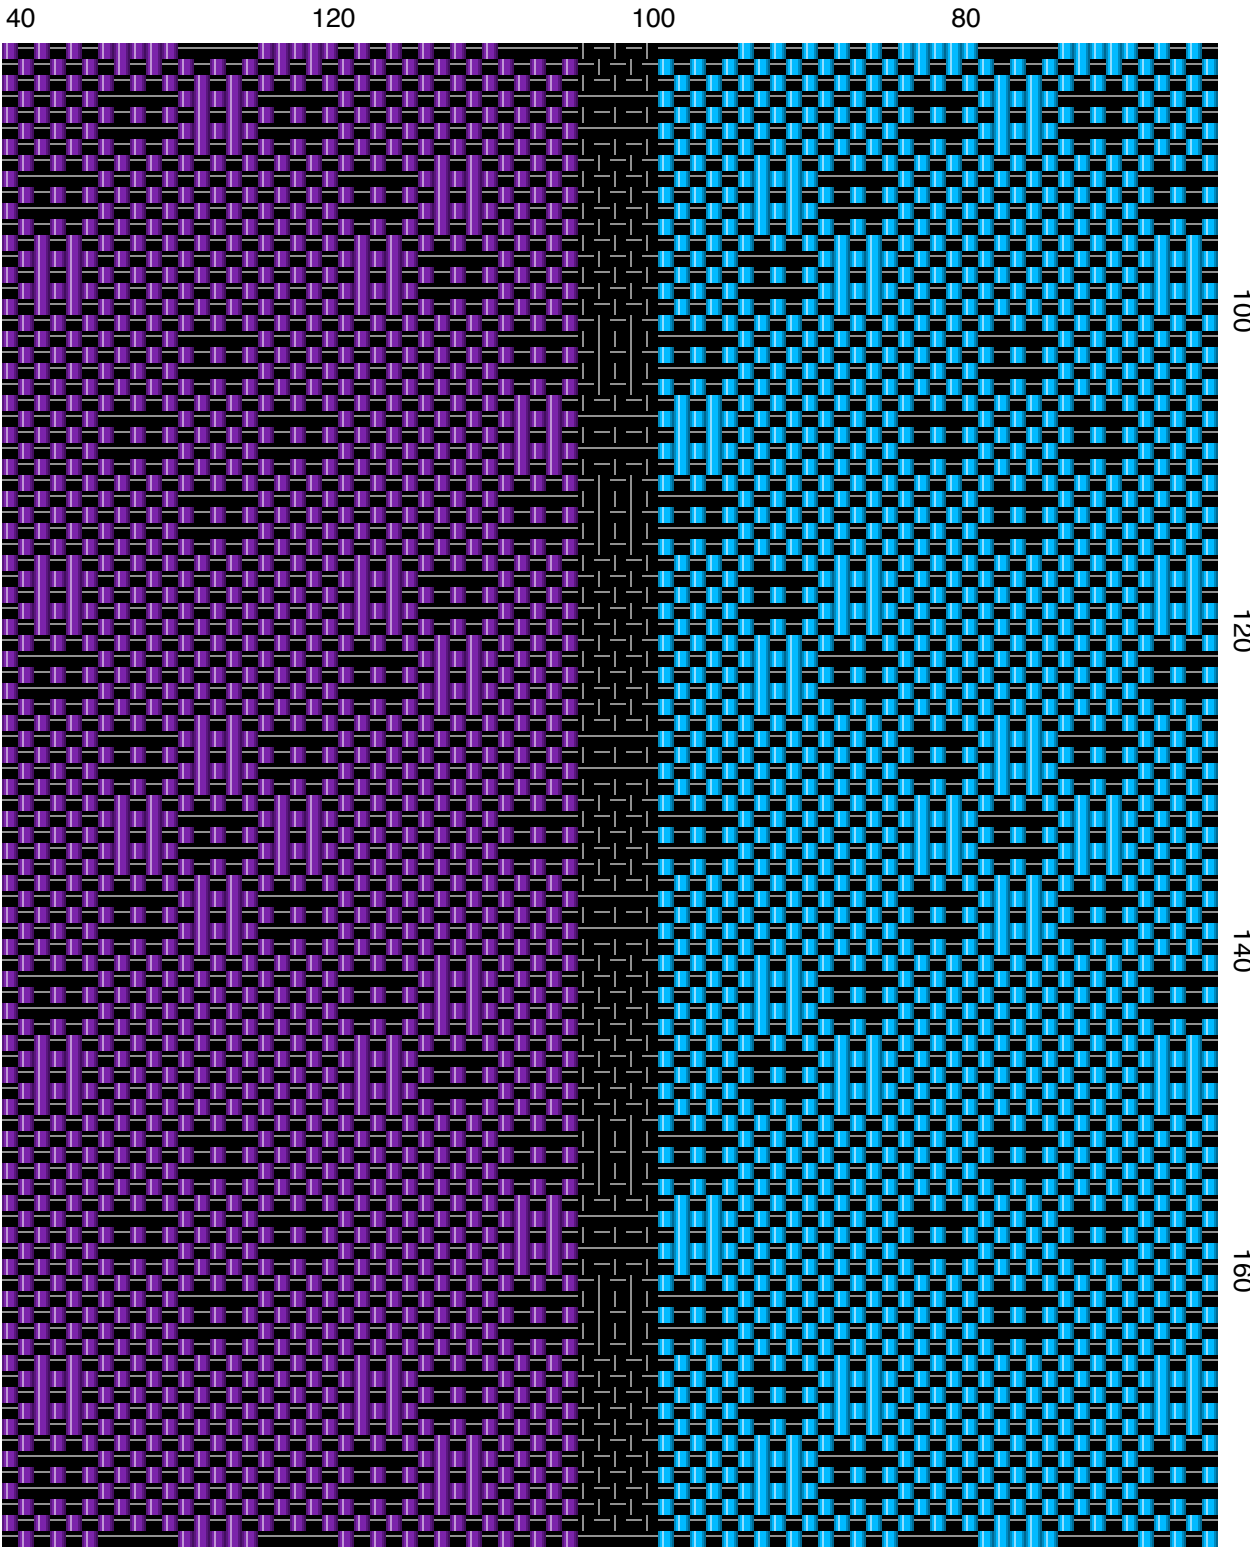

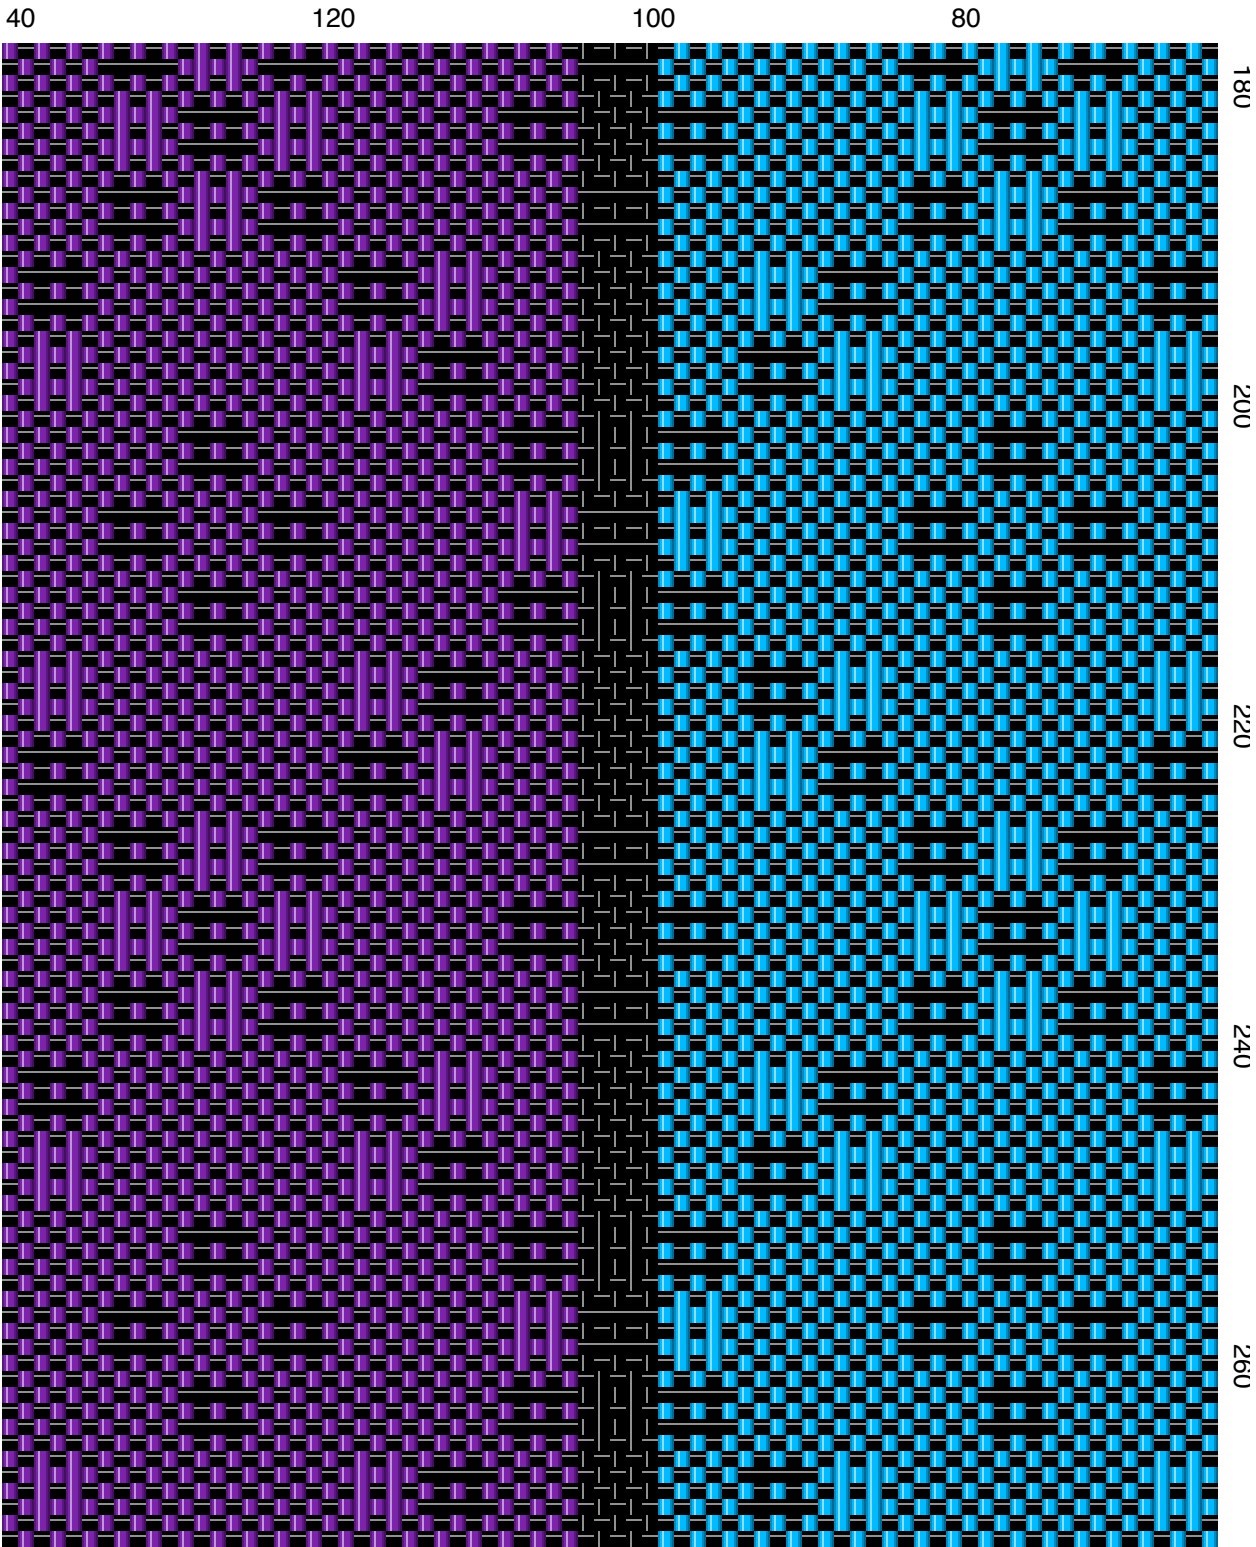

Figure 1: A schematic diagram of a 2D lattice. The lattice is divided into two regions by a central vertical interface. The left region (x < 0) is colored purple, and the right region (x > 0) is colored blue. The top part of the diagram shows a 1D lattice with site indices 40, 120, 100, and 80. The bottom part shows a 2D lattice with site indices 20, 40, 60, and 80. The central interface is marked by a vertical line of black squares.
